Dispensing Equipment Disconnect (DED)

**Creating Systems to *C*ontrol, *P*ower & *I*ntegrate Your Business**

The ***CPI Dispensing Equipment Disconnect (DED)*** is designed and manufactured to supply our customers with a cost effective solution to disconnect the dispenser's pump data, POS data and intercom signal wires during an emergency fuel shut-off scenario. The DED panel is UL Listed and is in compliance with NFPA 30A, Section 6.7, NEC 514.11 and NEC 514.13 code regulations.

E-Stop Power Circuit
supplies 120VAC power source to the DED panel.

NEMA 1 Enclosure
With lockable cover.

DED Distribution Board
Up to 12 DED boards installed vertically for space savings.

DED Board
Up to four (2-wire) data disconnect circuits per board. Can be used for pump data, pos credit card info, and /or intercom connections.

TERMINAL BLOCKS
Removable for easy field wiring and replacement.

(1) Maintenance Disconnect
switch per DED board.
